

Fuel Recovery Charge Rate Table

5280 Waste Solutions | Based on the EIA Rocky Mountain (PADD 4) weekly on-highway diesel price

How to read this table. Find the most recent weekly EIA Rocky Mountain (PADD 4) on-highway diesel price published before your invoice date, rounded to the nearest cent. The percentage next to it is the fuel recovery charge applied to your service charges on that invoice.

How the rates are set. The baseline is \$4.989 per gallon (the June 2026 regional average), where the charge is 5.00%. Above the baseline, the charge rises 8 percentage points for every \$1.00 per gallon. Below it, the charge falls 4 percentage points for every \$1.00, so it eases down more gradually than it climbs.

Outside the table. When the EIA price is below \$3.75 per gallon, no fuel recovery charge applies. Prices above \$8.00 per gallon are handled separately; please contact us.

Check the index yourself: eia.gov, Weekly Retail Gasoline and Diesel Prices, Rocky Mountain (PADD 4).

Highlighted row: closest cent to the \$4.989 baseline. Bold rows mark every \$0.10.
